

QBE Rehabilitation

QBE Return+

A pre-claim rehabilitation service designed to help employees return to work after workplace incidents, even when a claim has not yet been presented.

Early Intervention

At QBE we believe best practice in claims management is taking a proactive approach to rehabilitation.

The faster we get involved, the more we can do to limit the cost of workplace accidents by safely and sustainably expediting your employees' return to work after injury.

QBE Return+

Our focus is helping your employees recover safely, by offering a rehabilitation services that assists you in managing your employees' health and wellbeing.

- A holistic rehabilitation service addressing both **physical and mental health** barriers to a successful return to work.
- **Quicker return to work**, reducing absence costs.
- Actively **protecting your claims position** by supporting your employees' recovery.
- A benefit available to all QBE **employers' liability policy** holders.

QBE Return+

Our industry-leading pre claim rehabilitation service QBE Return+ on average achieves a quicker return to work for your employees post injury.

As a result, this reduces absence costs incurred for you and any loss of earnings component of any claim made.

QBE Return+ offers rehabilitation services in line with a standard employers' liability policy, and actively protects your claims position.

An injury management rehabilitation service that's tailored to your organisation's needs

A Closer Look

For one employee, an Achilles tendon (heel) injury sustained in the workplace meant having to be absent from work.

Following a referral to the Return+ service from their employer however, they were supported with a full course of face to face physiotherapy.

At last contact with the employee, they reported their condition had resolved and informed us they were managing well back on full duties at work, including overtime hours.

From our provider's expertise in case management, and indications from injury measures in the industry, evidence suggests that the injured party returned to work on average 15 days faster, than if they had not engaged with rehabilitation provided by the Return+ service, showcasing the benefits of early intervention rehabilitation.
